

Electric Burning FirePlaces

If you would like to add the look of a fireplace or stove to your home, but you don't have wood or access to a gas supply, consider an electric unit from [Dimplex](#). [Dimplex](#) electric fireplaces use 90% less energy than gas fireplaces to produce visual flames. No combustion means no greenhouse gasses. Fireplaces equipped with *Purifire* air treatment system improve indoor air quality. Electric units ideal for zone heating - warm a 20' x 20' room and lower the central thermostat. In addition, they are 100% efficient with no wasted energy. At Fireplaces 'N' Fixin's, we display a wide variety of [Dimplex](#) fireplace, stove, and inserts.

[Dimplex](#) invented the modern electric fireplace and continues to lead the way with exclusive technologies that dazzle the eye and seduce the senses. Their patented 3-D effect gives the fire its depth and dancing flames. And it's something you can only find on [Dimplex](#) electric products. We invite you to stop by and see for yourself why [Dimplex](#) is the best choice in electric.
